## DALI MENUET SE

- A tribute to high performance, compact stereo

Built on the legacy of the DALI MENTOR MENUET and DALI MENUET, we would like to introduce you to their wild-looking sibling; DALI MENUET SE.

- DALI MENUET SE is a Special Edition version of the popular DALI MENUET. Using our knowledge and experience, we have improved the sound quality and created a fantastic new finish.
- Each and every DALI MENUET SE are carefully hand-assembled, tested and finished by the same DALI employee to ensure the highest possible quality. After the final quality test and inspection, each speaker is given a special brass plate with the initials of the DALI employee who assembled the speakers.
- These tiny, but incredible speakers are based around a 4.5" woofer and a 28mm/1.1" soft dome tweeter, and deliver so much more than meets the eye.
- Listen to these brilliant loudspeakers and you will hear plenty of clean, undistorted bass, open and dynamic midrange and detailed/crisp highs.
- DALI MENUET SE is based on the same attributes as the original DALI MENUET, but has a new unique look as well as great improvements to the components, giving this wild-looking sibling a unique personality.

### Visual appearance

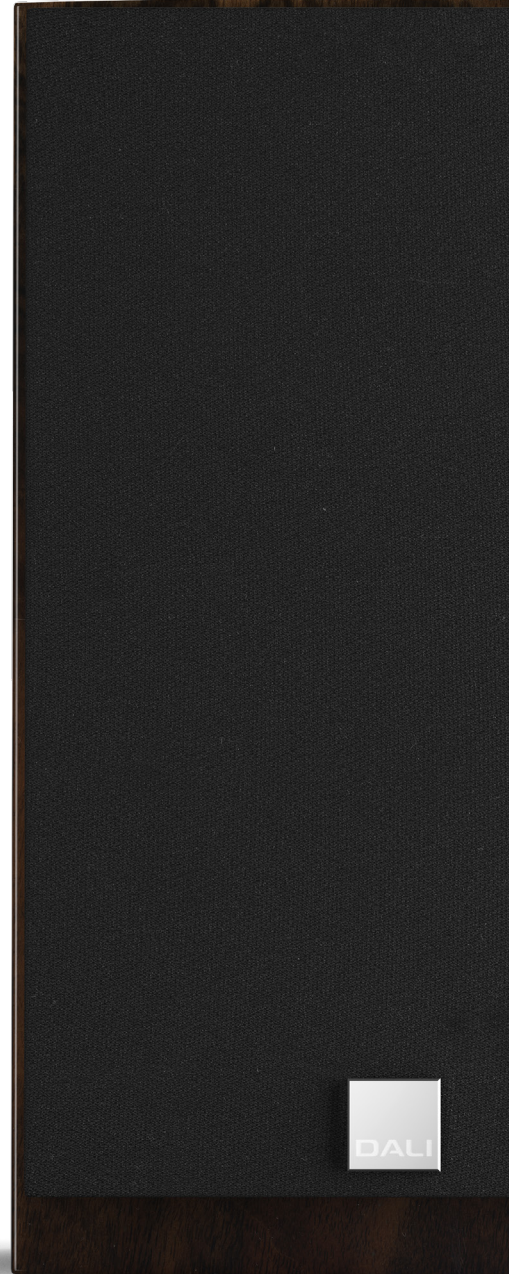

- DALI MENUET SE comes in a new eye-catching finish, Wild Walnut Veneer, which is made from a variety of natural walnut wood.
- The use of this stunning veneer finish means that every single matched pair of DALI MENUET SE loudspeakers will be unique in appearance. The cabinets are carefully selected for the closest match and no two pairs will look the same.

### Components

- The crossover has been substantially upgraded with premium grade Mundorf™ capacitors, which have been carefully selected through vigorous listening tests.
- The board material of the crossover has been upgraded to a material with extra high electrical insulation, which minimises the electrical interference between the individual crossover components.
- The terminals on the rear of the speaker are high-end DALI EPICON terminals, which ensure that DALI MENUET SE always has the best possible connection regardless of speaker cable choice.
- The DALI MENUET SE woofer also uses a voice coil former made out of fiberglass, which reduces mechanical loss in the voice coil and minimises distortion.

### SPECIFICATIONS

#### DALI MENUET SE

FREQUENCY RANGE (+/-3 DB) [HZ]	59 - 25,000
CROSSOVER FREQUENCY [HZ]	3,000
SENSITIVITY [2.83V/1M, DB]	86
NOMINAL IMPEDANCE [OHM]	4.0
MAXIMUM SPL [DB]	105
ENCLOSURE TYPE	BASS REFLEX (REAR)
RECOMMENDED AMP. POWER [W]P	20 - 100
TERMINALS	SINGLE-WIRE
DOMES TWEETER [MM]	1 X 28
