AUDIOVECTOR QR 5

The design goal of the QR series has always been to offer the most advanced technology in a perfectly finished compact high-end package. The sound is big and bold, dynamic, pleasant and detailed – excellent for all types of music. The QR 5 floor standing loudspeaker fits nicely into any home environment regardless of style. The QR 5 is now the biggest speaker in the QR series and by far the best performer. The perfectly detailed and sweet treble promises endless hours of musical joy without fatiguing your ears. The powerful and dynamic bass will allow any recording to sound life like and at its very best. The QR 5 is a 3 way loudspeaker with Q-port down firing bass reflex system and matches its smaller siblings perfectly. With the addition of the powerful QR Sub, the detailed QR Center and the easy placed QR Wall, we are proud to be able to deliver a very potent and powerful home cinema system.

THE GOLD LEAF AIR MOTION TWEETER

The fascia plate is machined from a single piece of Aerospace Grade Aluminum. It has been precision machined, glass blasted, brushed and then anodized in a beautiful Tungsten Titanium grey color. It features a rose gold-plated dispersion mesh, which works as an S-Stop filter.

S-STOP FILTER

Inspired by the POP filters used in the professional recording industry, we have engineered a dispersion mesh in front of the tweeter, which also works as an S-STOP filter, controlling sibilants. Music never sounded more detailed, yet sweet, from loudspeakers in this class. Just Listen.

PURE PISTON DUAL MAGNET BASS DRIVER

This new Audiovector drive unit works like a perfect piston over several octaves of the frequency band without the distortion normally found in aluminum/diamond drive units. This means music sounds warm, precise and detailed, yet dynamic and musical.

NEW MEMBRANE TECHNOLOGY

Based on our experience with stiff, light and sound dead membranes in the SR- and R-series speakers, we have developed a new sandwich membrane. The new membrane combines the strength of Aero Space Grade Aluminum with the excellent inner damping properties of softer materials. The result is a 3-layer sandwich membrane with no sound of its own and very low distortion. It performs like a pure piston up to and above its working range.

BLACK PIANO

DARK WALNUT VENEER

WHITE SILK

SPECIFICATIONS:

Frequency response	25 – 45 kHz
Gold leaf upper limit	102 kHz
Treble system	Gold Leaf AMT 2 with S-stop
Midrange system	6" Pure Piston Mid
Bass drivers	2 x 6" Pure Piston Bass
Bass System	Q-port down firing bass reflex

System / x-over frequencies	3 Way / 400 Hz/3 kHz DFF
Sensitivity, 2.83V, 1 metre	91 dB
Power handling (music)	280 W
Impedance	4 Ohms (very easy load)
Dimensions (cm)	105,7 x 21 x 27
Weight	22.9 kilos
