

Cabasse

EOLE 4

ELEGANCE AND PERFORMANCE

The Eole system concentrates in a small volume all the acoustical virtues inherent to every Cabasse speaker: efficiency, power handling, transparency and 3D stability of the soundstage. In the Eole 4 version we enhanced the sonic quality of the satellites thanks to discrete but significant technical and esthetical improvements, when the slim shape of the Lipari subwoofer widens the integration possibilities without sonic compromise. Offer a small and discreet system with a great and big sound to your living-room.
