

Ci SERIES 2013-14

KEF
INNOVATORS IN SOUND

HIDE YOUR SPEAKERS, NOT YOUR SOUND

For music or movies, your installation needs to deliver the flawlessly accurate three-dimensional sound you'd expect from the best conventional speakers - startlingly clear and breathtakingly realistic. And that's exactly what our Ci range does.

KEF's passion for acoustic excellence shines through in every model. By combining radically innovative engineering with sophisticated design technologies, the Ci range achieves what used to be thought impossible: compact custom installation speakers that sound as compelling as an audiophile quality hi-fi system, no matter where you sit.

With impeccable cosmetics, there's a KEF Ci model for every application, from tiny ceiling speakers the size of downlights to motorised super-premium home theatre speakers that glide into place at the touch of a button. All are ruggedised for harsh environments such as bathrooms or boats.

INNOVATORS IN SOUND

Of all high-end British loudspeaker brands, only KEF has a 50 year record of innovation and pioneering use of advanced materials and techniques like finite element analysis. From design breakthroughs such as the Uni-Q® 'sit anywhere' driver array and the ultra-slim T Series to the flagships Blade and LS50, KEF is continually redefining the state of the art.

This technology leadership has always been what sets KEF's installed systems apart, ever since our revolutionary Motorised and Soundlight models. Today, you can choose from a superlative range of whole house solutions to suit any space, large or small, outside as well as in. Discreet in appearance, easy to install and engineered to last, what they all share is best-in-class acoustic performance. And that's the real difference - with KEF's Ci Series, everyone gets to enjoy uncompromised audiophile quality sound.

All KEF speakers are timbre-matched, with each other and with KEF's extensive range of home speakers, so any combination you specify for different listening areas will have the same tonal colour for a perfectly consistent soundstage.

Fast, easy installation has always been valued by Ci Series installers. With only a few simple steps and KEF's unique design features, Ci speakers can be fitted quickly, with no special skills. Once the hole is cut and the cable run, the area is soon flooded with great high definition sound.

CI FEATURES AND TECHNOLOGIES

Whatever your budget, you'll find that the clarity, depth and sheer realism of the sound you experience with Ci Series speakers is enhanced by technologies found nowhere else.

Uni-Q driver array - KEF's patented Uni-Q technology places the tweeter in the acoustic centre of the bass/midrange cone so that both act as a single source that disperses the sound widely and evenly over a large area. By eliminating the 'sweet spot' restrictions of conventional speakers, this gives you complete freedom of positioning.

Asymmetrical tweeter island - In non-Uni-Q models, this aligns the off-axis response of the tweeter and woofer to make the speaker almost as placement-friendly as Uni-Q.

Special grille treatments - With grilles powder-coated by a proprietary process, moisture-resistant fixings, UV protected plastics and other rugged materials, KEF Ci Series speakers withstand humid and salt spray conditions such as bathrooms, near pools, beside the ocean or on your yacht.

Tangerine waveguide - As well as protecting the driver, this enhances Uni-Q's exceptionally wide dispersion characteristics.

Magnetic assembly - Grilles are retained by a powerful magnetic circuit for installation in seconds.

EXTREME HOME THEATRE

For the ultimate in custom installed home cinema, the formidable new Ci Reference Series has the jaw-dropping acoustic capabilities of the classic KEF floorstander it's named after, with all the drama and emotional intensity of full theatre sound quality. Ci Reference Series consists of an in-ceiling speaker that can be combined with one of three in-wall models and a choice of two sensational new powered subwoofers. As you might expect, its towering performance sets a new standard for custom installed speakers.

EXTREMELY LOW PROFILE

With its patented ultra-low profile speaker driver, the revolutionary T Series Ci I60TR fits snugly into even the narrowest voids while delivering all the lavishly detailed and evenly dispersed imagery of KEF's latest Uni-Q technology. Requiring less than 36mm of mounting depth, it allows you to install a speaker that delivers full audiophile quality sound even when space is at a premium. As easy to fit as any other KEF Ci speaker, and an equally accomplished sonic performer, it's another example of KEF innovation benefiting the installer as much as the listener.

AMPLIFICATION

KASA500 is a powerful Class-D Dual 250WPC amplifier. This DSP controlled subwoofer amplifier is optimised to deliver thunderous bass from KEF Ci subwoofers. With both line and speaker level inputs, and DSP configurable pass-through - the KASA500 is versatile and can be deployed in limitless system configurations.

T SERIES

When nothing else will fit, at 40mm (1.57in.) deep, requiring a mounting depth of only 36mm (1.42in.), the Ci160TR is the slimmest two way Ci speaker in the world, and fits snugly into even the narrowest voids without compromising audio performance.

SOUNDLIGHTS

As discreet as halogen downlights, KEF's tiny Soundlights give you big speaker performance with outstanding sound coverage, thanks to Uni-Q's exceptionally wide dispersion.

DUAL STEREO

For areas with space for only one speaker, KEF's Ci Series Dual Stereo model plays left and right channels from a single unit, containing twin tweeters and a dual voice coil woofer.

MOTORISED

Lowering smoothly and quietly into place on demand, the Ci Series motorised range offers the ultimate in discreet audiophile quality home entertainment speaker systems.

COMMERCIAL

Ci Series Commercial in-ceiling speakers assure clarity, reliably consistent tonality and superlative build quality for music, paging and announcements in business or retail premises.

- Integral fire-rated metal rear enclosure
- UL2043-approved for use in air handling spaces
- UL1480-5-approved for use in fire protection signalling systems
- Front-mounted switch for selecting 8ohm or 70/100 volt operation
- Includes the hardware for mounting above a suspended ceiling or in a hard ceiling

ULTRA THIN BEZEL

 Offers the slimmest visible rim around the speaker for the ultimate in discreet installation.

OUTDOOR

Weatherproof, IP65 certified and salt spray tested, marine quality Ventura Series outdoor models can flood your pool, garden or yacht with high quality sound, even in the most extreme atmospheric conditions.

- Weatherproof sealed enclosure
- Salt spray tested for over 1200 hours
- Operating temperature range: -40 to +70 C (-40 to +158 F)
- Independent test lab certified IP65
- Aluminium grille and mounting bracket, 1/4"-20 threaded inserts for mounting options
- Stainless steel / brass hardware
- Rotatable logo

CLASSIC BEZEL

 Ci Series combines the smart snap-in grille of KEF's original Ci speakers with the ruggedness of our new range.

* KEF Ci subwoofers requires the KASA500 subwoofer amplifier. † Not all accessories and finishes are available in all markets, contact your local dealer for specific range details.

Ci SOFTWARE

Simple to use, with pull-down menus and sliders to define the room size, desired volume and coverage pattern, the KEF Ci Series speaker placement software generates optimum speaker locations, wiring diagrams and sound coverage topography to help you determine the right number of speakers for the area concerned.
